

Eggciting Eggsperiment

We helped Humpty Dumpty to investigate which material is the best to protect him when he falls off of the wall. We pushed him off the wall in a bag with nothing to protect him, a bag with pasta in it, a bag with stones in it, a bag with cotton wool in it and a bag with a fleecy blanket in it. Poor Humpty Dumpty! We found out that soft materials provide the best cushion for him.

We learnt about the life cycle of a chicken – we talked about the stages we saw when we had the eggs with us.
