

**Forest School – Week 2**

After damp and windy start to the week, which meant Alien Class unfortunately could not have their session at Forest School, the classes that went had a great time. We remembered the safety rules from last week and tried so hard to make sure we followed them.

This week we looked at the different trees in the surroundings and learnt their names. We then used some of their leaves to print with them. We saw the different patterns they made. We also had the chance to meet the animals at the farm. We learnt the goat's names and they were very friendly coming to greet us. We had a go on the zip wire, which was great fun but a little scary for some of us. We were all very brave! We also learnt how to whittle wood to make wands. We used the potato peeler to take off the bark and decorated them to make wands. We had to use the peeler very carefully and safely.

Another great session with lots of happy children.

We are looking forward to our next visit!
