

Forest School – Week 4

This week at Forest School we built a den for shelter. We worked together to gather all of the materials that we would need to build the den and everything that we needed to go in it. Look at our fantastic teamwork!

We also went on a bug hunt. We talked about the places that we might find bugs and looked carefully around the forest. We found lots of different bugs and used the identifying sheets to find out what they were called.

We all know the safety rules around the fire circle and enjoyed toasting and eating our marshmallows.
